# SVAB B1 Joystick Grip

The SVAB B1 Joystick grip designed for machines with lower specifications

## Description

The B1 joystick is designed for operators who require only the most essential functions to succeed in their tasks. Thanks to its straightforward design, machine operators can quickly adapt to its functionality with ease. Despite its simplistic appearance, it boasts highly ergonomic design features.

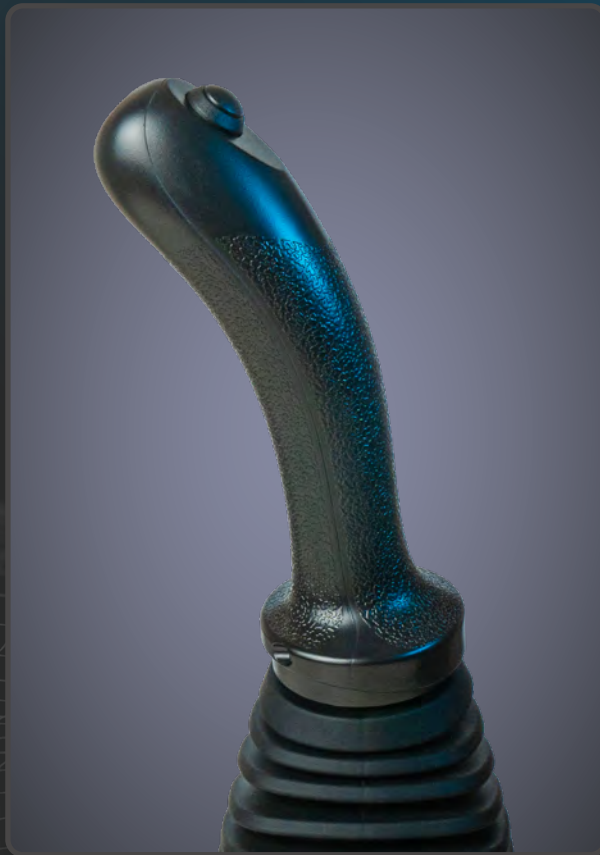

The grip features a single thumb-operated button, which can be customized in a specific color, led-light or symbol.

## Features and benefits

- Ergonomically designed
- Optional with haptic feedback
- The joystick easily attaches to both hydraulic and electronic bases available in the market.

## Standards and compliances

Developed in accordance with the Machinery Directive 2006/42/EC ISO10968:2020

## Technical data

### MECHANICAL DATA

Weight	Up to 110g
Material	Plastic
Color	Black

### ELECTRICAL DATA

Electrical interface options	Analog/Digital
------------------------------	----------------

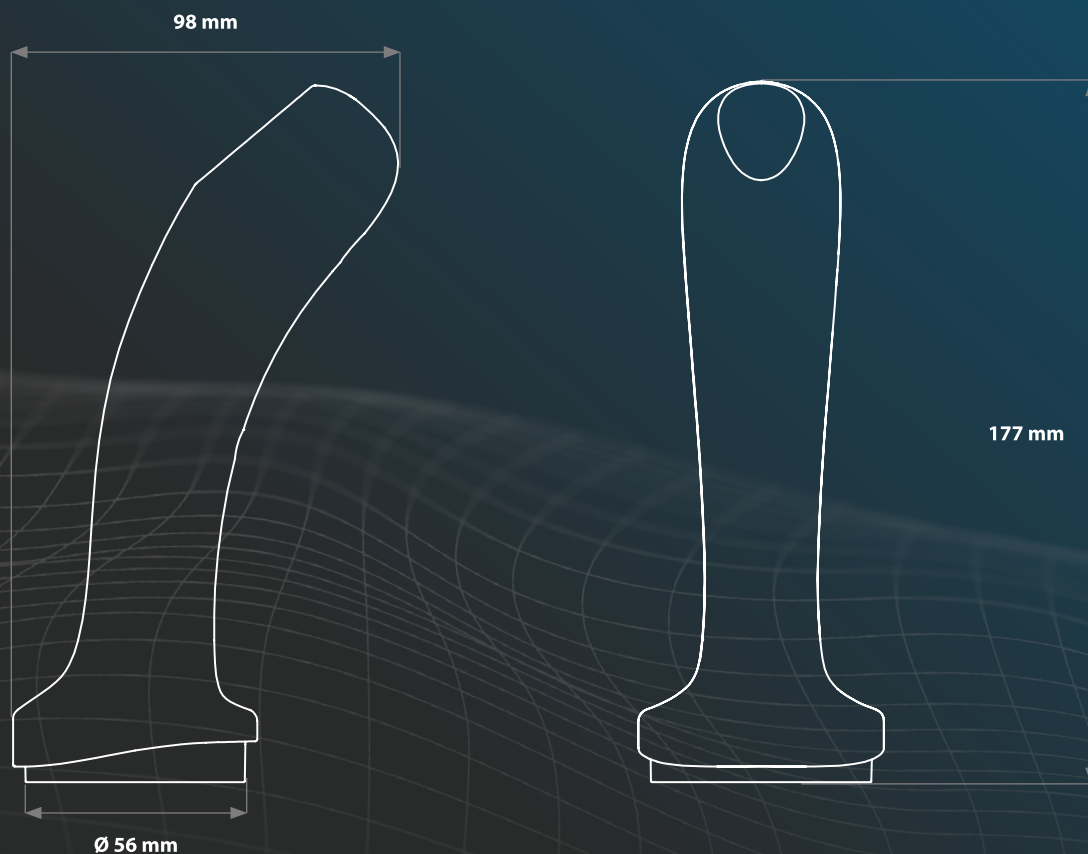

### ENVIRONMENTAL DATA

Water/dust rating	IP65
Operational temperature	-40 °C to +85 °C

### CONFIGURATIONS THUMB OPERATED CONTROLS

1 button

## Dimensions

**SVAB Hydraulik AB**
